

Communicator Release – November 10, 2022

## Overview

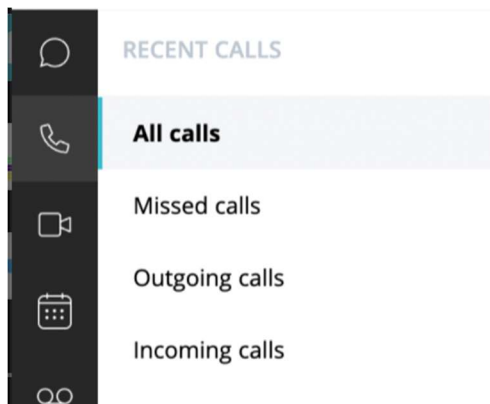

This release is focused on bug fixes and improvements for all 3 Communicator platforms:

- Desktop/Web app – “Pristina” Release
- iOS Mobile app - Version 1.1.3 Release
- Android Mobile app – Version 0.1.3 Release

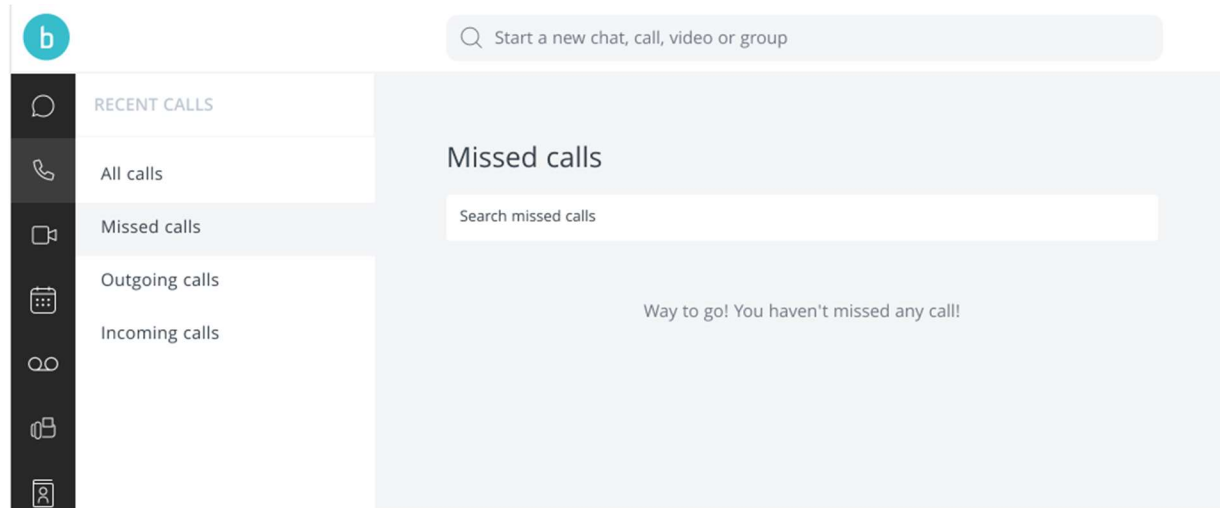

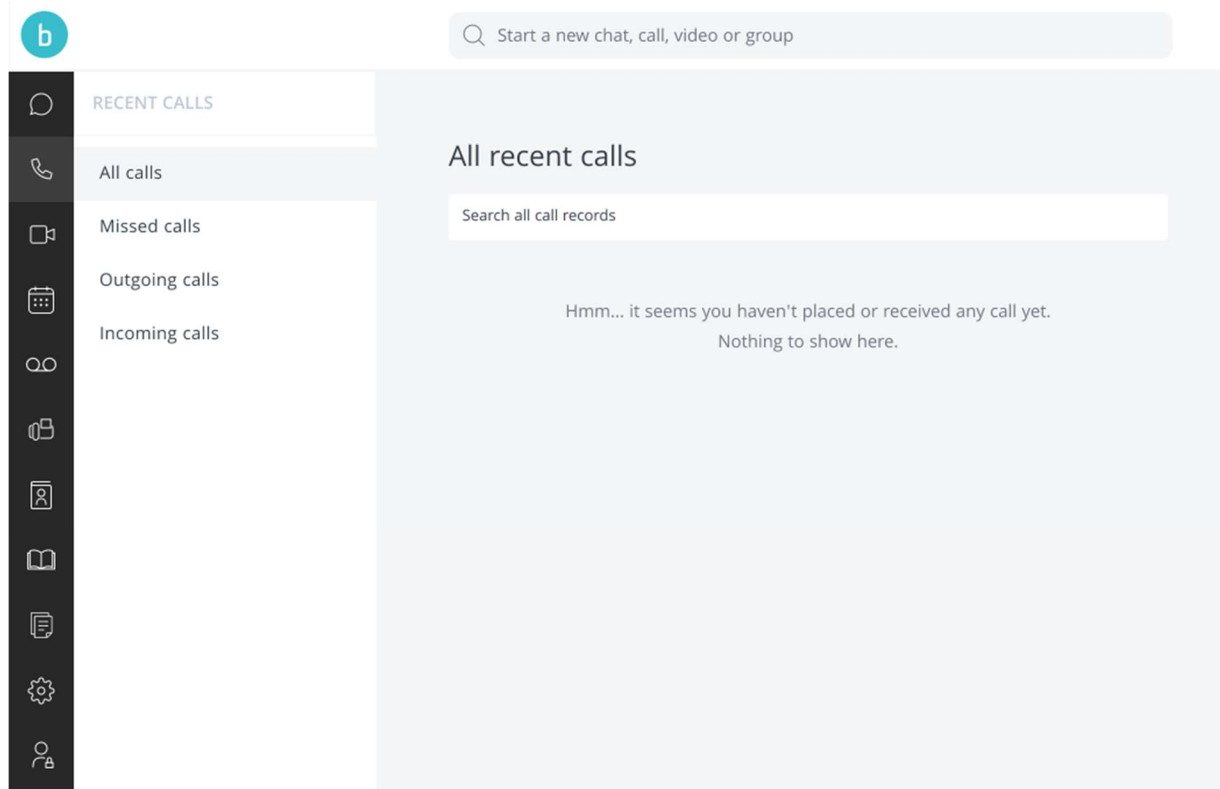

## Features

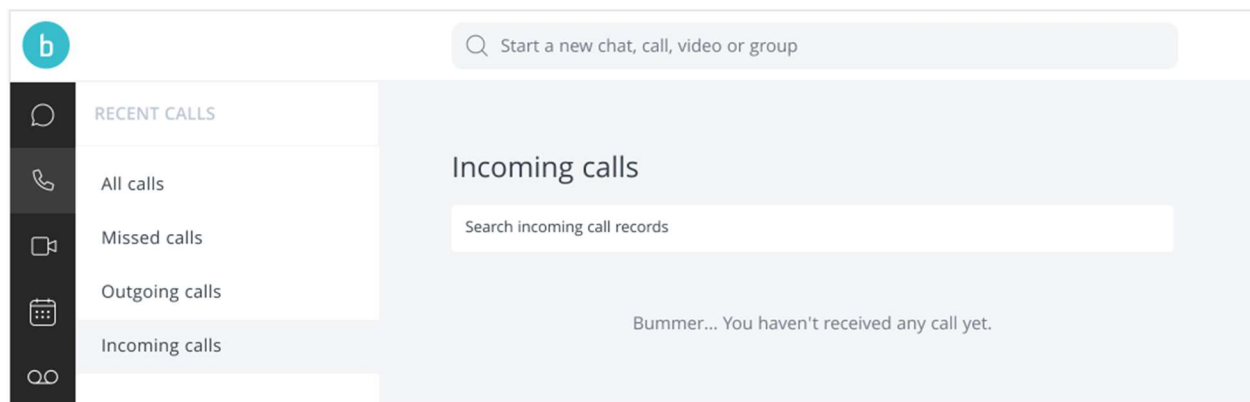

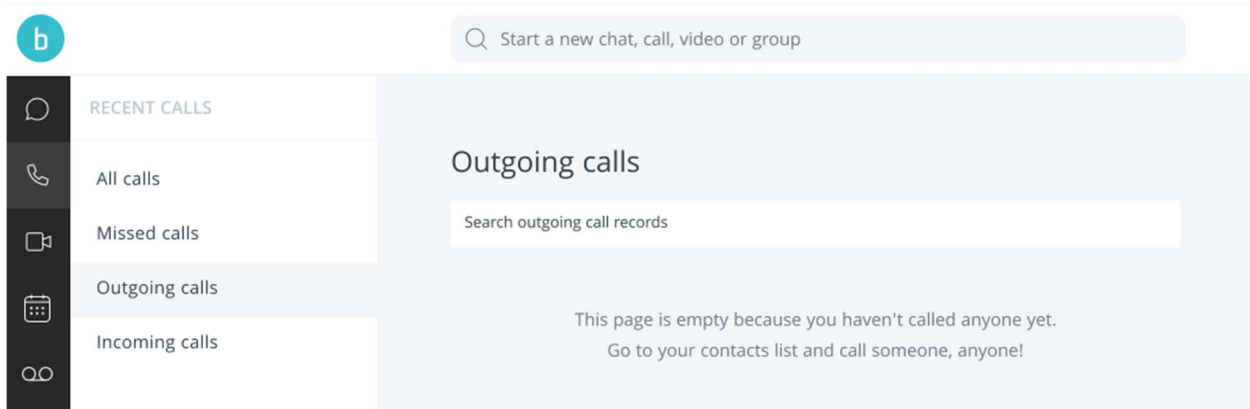

### Desktop/Web app – “Pristina” Release:

- Call Logs (Flagged, not visible to the users until completed)
  - [CUU2-1011](#): Back End - Setting up the project
  - [CUU2-1018](#): Back End - Prepared the call logs services
  - [CUU2-980](#): Back End - Creating the configurations that are needed for deploying the changes on the different environments
  - [CUU2-979](#): Back End - Added the ability to Save Call Logs
  - [CUU2-989](#): Front End - Added the skeleton pages for implementation and details - Added the left side navigation which contains:
    - All calls
    - Missed calls
    - Incoming calls
    - Outgoing calls

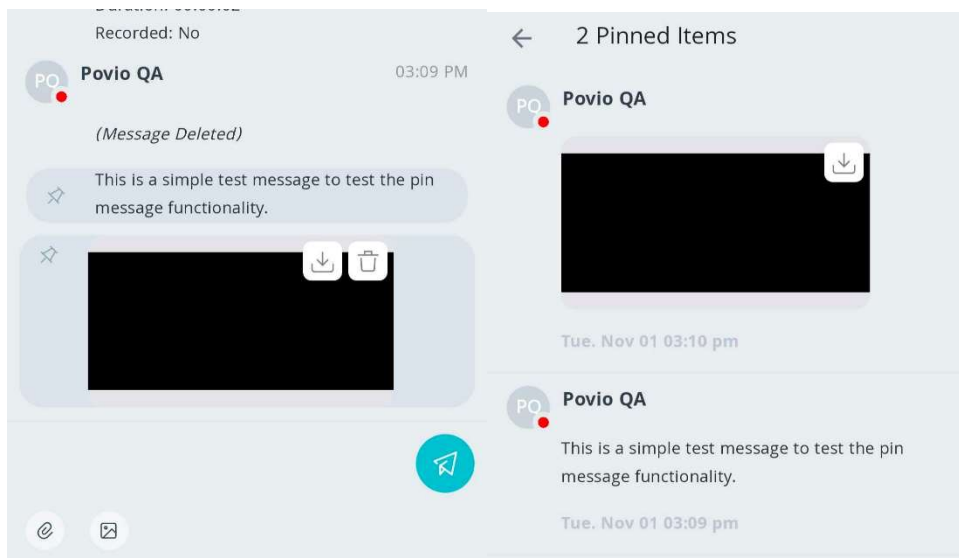

- [CUU2-1001](#): Created and added the pages when there are no results, how the UI should look like in these cases:
  - When there are no calls at all
  - When there are no Missed Calls
  - When there are no Outgoing or Incoming calls

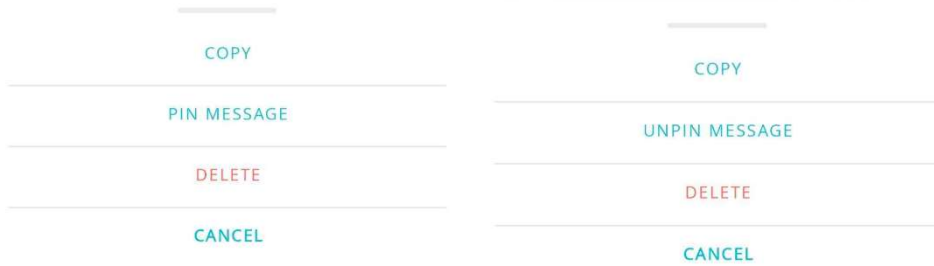

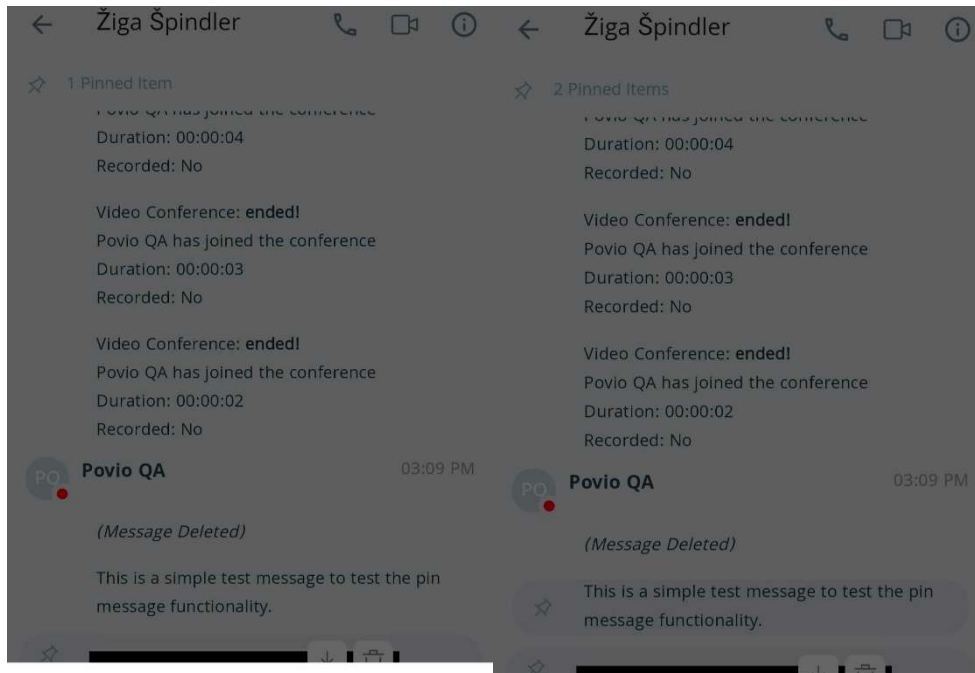

### Android Mobil app – Version 0.1.3 Release:

- [BAMA-617](#): The ability to Pin messages in chat is added

## Improvements

### Desktop/Web app – “Pristina” Release:

- [BC-2614](#): Added the ability to copy messages in the chat: User has the ability to right click and copy any messages on chat.

### Android Mobil app – Version 0.1.3 Release:

- [BAMA-708](#): Refactoring: Separate screens will be used for showing Broadvoice contacts, phone book contacts, and contacts with phone number only - instead of using a single screen and showing/hiding fields based on contact type.

## Bug Fixes

### Desktop/Web app – “Pristina” Release:

- [CUU2-539](#): User can't enter input in the text field. Text is entered into the chat field instead. User should be able to enter input into the text fields.

### iOS Mobile app - Version 1.1.3 Release:

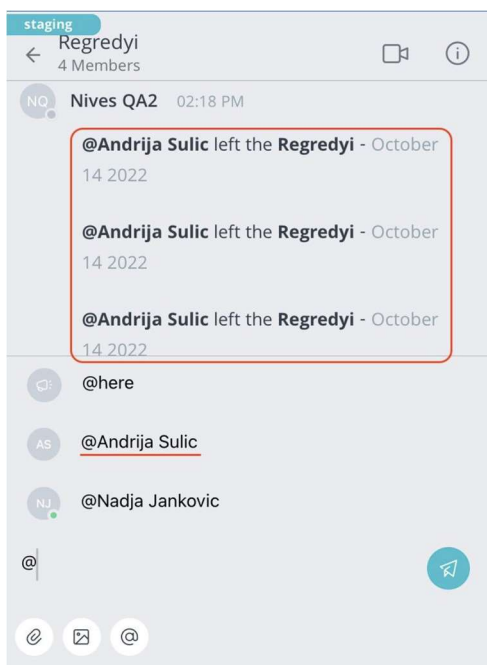

- [BIMA2-465](#): Group members are displayed as @ symbol, instead of their username
- [BIMA2-449](#): Letters can be inserted as valid characters in the phone number field, but the changes aren't saved. Fixed so that letters cannot be entered in the phone number.

NAME
Nives
QA2

  

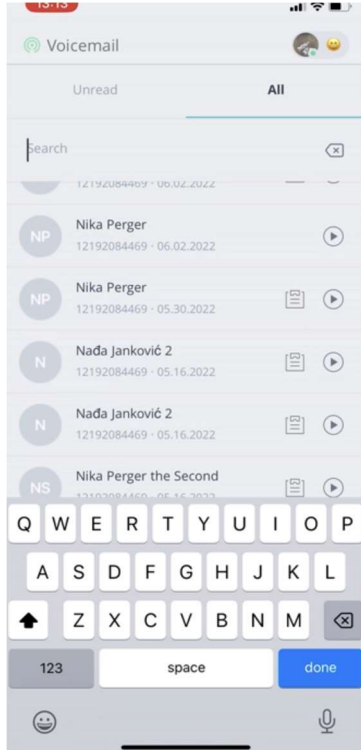

PHONE
18582356258

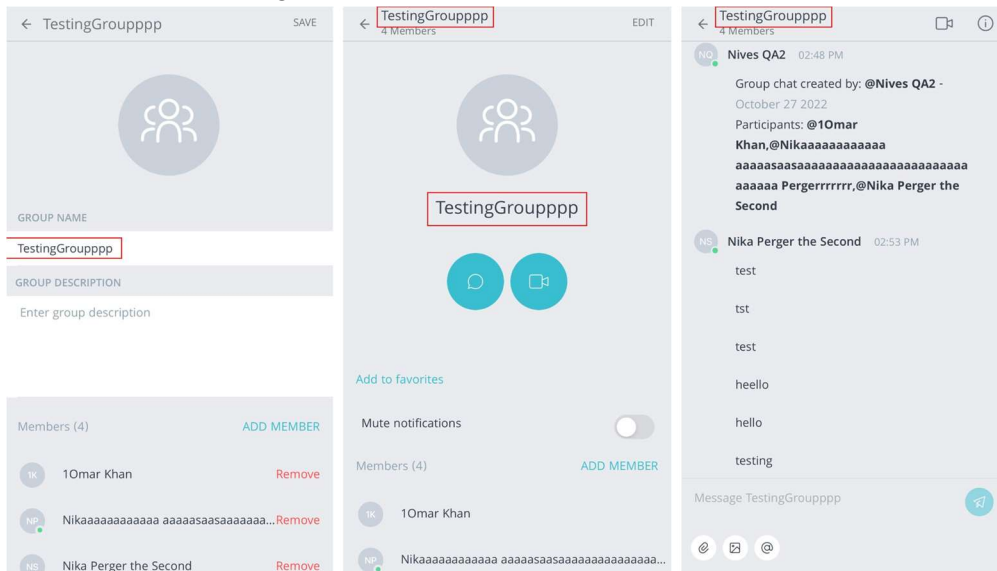

- [BIMA2-448](#): The user can forward voicemail to himself. Fixed so that the user can forward voicemail to the users from the user's list but not to himself.
- [BIMA2-432](#): Edits made to chat group members aren't saved, and edits can only be made once.

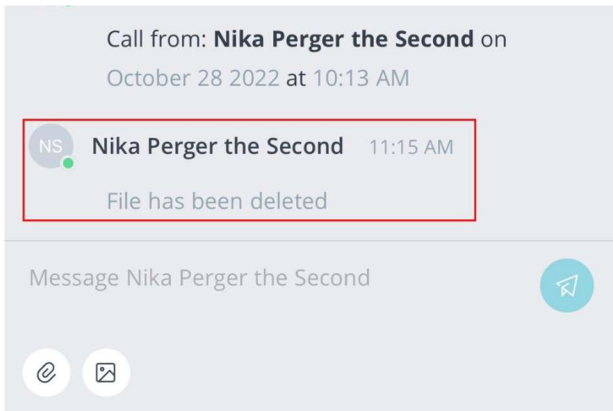

- [BIMA2-446](#): Voicemails at the bottom of the screen are overlaid by the keypad when it is opened.

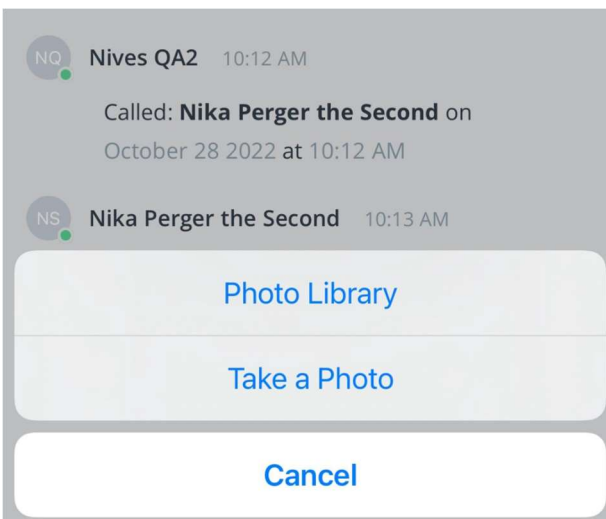

- [BIMA2-431](#): An edited group name or description isn't displayed immediately everywhere in the group. The user needs to exit the group chat and then return to the chat tab for the changes to be seen.

- [BIMA2-430](#): The “File has been deleted” message was not shown when a file was both received and then deleted after the user had already opened the chat history page for a conversation.

- [BIMA2-422](#): Fixed so that the input text message field and keypad are not displayed when the user either: presses the paper-clip attach file icon, the image icon, or long-presses a message – when the keypad is open. Now the text message field and keypad are hidden when the menu selectors for accessing the phone library, taking a photo, etc. are displayed.

- [BIMA2-408](#): Fixed so that the loading icon is not displayed on the Keypad subtab after the app is installed, when there is no data to load.

- [BIMA2-394](#): Fixed so that the MMS message Send button is not enabled until after a selected file is done uploading.

## Android Mobil app – Version 0.1.3 Release:

- [BAMA-767](#): Loading icon continues to be displayed after a file is uploaded to an MMS message, and the user can send the message while the loading icon is still being displayed. Fixed so that the loading icon stops being displayed once the file is done uploading.
- [BAMA-611](#): Added the missing Rejoin button for rejoining a video meeting.
